# PAPER DOILIES

***“Everything is designed. Few things are designed well.”***

*— Brian Reed*

To make a truly beautiful, clean, white doilie is an art form and the specialists at Lapaco have spent decades perfecting that art. We have proprietary processes and equipment that allow us to deliver the best doilies in North America.

**Key Elements of Lapaco Doilies:**

|                                 |  |
|---------------------------------|--|
| • Crisp, elegant designs        | • Provides operators a range to choose from to complement their décor  |
| • Clean, operationally friendly | • Cleanest product on the market. No more worry about paper chips or flakes flying away to get into the food, stick to the wait staff uniforms or dirty the kitchen or dining room |
| • Food grade white sheet        | • Lapaco’s white doilies are made from a unique doilie paper that complies with FDA requirements for food contact  |
| • Environmentally friendly      | • Compostable  |

**Use Doilies:**

- As a beautiful frame for a dessert or pastry
- Between a cup and a saucer to reduce noise
- Under a candy for a hotel turn-down service
- Beneath the salt, pepper or vase on the tabletop
- To provide added slip resistance under a cake or other baked good
- To add elegance to the tabletop

## Glassine vs. Grease Resist: What is the difference?

### Glassine:

- Glassine is the same paper as regular doilie paper but it is polished to a high shine
- Glassine is less sticky than regular doilie paper
- Glassine is the best choice for refrigerated areas
- Glassine does not resist oils, fats or butter from moving through the paper

### Finding the perfect fit

To ensure the proper match between baking pan and baking paper, we have provided the measurements for all the baking papers offered. Measurements include Blank (overall diameter), Base Diameter and Wall Height. To get the correct measurements from an existing baking cup, flatten out the baking cup and lay it on a hard surface. Using a ruler, measure the three dimensions show above. The same principles apply to measuring oblong products, using the chart below.

# NU-LINEN® PRODUCTS

***“Simplicity is the ultimate sophistication.”***

*— Leonardo da Vinci*

Nu-Linen® is a practical expression of elegance, offering a soft, functional material designed to look and feel like cloth with the benefits of a disposable.

Nu-Linen is available as dinner or beverage napkins and guest towels/dinner napkins. It is the perfect fit for fine and casual dining restaurants, BBQ restaurants, caterers, banquet halls, healthcare facilities, country clubs, locker-washrooms, resorts and lodging, spas, universities or any establishment seeking an outstanding product that will impress their guests.

Save money with Nu-Linen. Linen services add additional costs to the bottom line such as delivery charges, service fees, replacement fees and laundering costs. These “hidden costs” make the Nu-Linen cloth-like products a more cost effective choice over linen.

***Key elements of Nu-Linen® napkins:***

- Elegant look and feel
- Reduced cost-in use vs. cloth
- No hidden costs such as service fees or replacement costs/disposable
- Lint free

## ENVIRONMENT

Lapaco is committed to protecting the environment. Lapaco strives to achieve the best manufacturing practices that have a minimal impact on the environment. Our manufacturing activities generate no polluting emissions. Additionally, almost all of our products are paper-based. Paper is, by definition, a natural product made with cellulose from wood fibers. Most of the papers we use contain recycled fibers in proportions up to 100%.\* Lapaco also recycles all of the paper waste generated by our manufacturing processes.

An important part of the Lapaco business is custom printed products. We have chosen to print our napkins with water based ink. Water based inks are much safer for the environment than oil based inks which is a standard for much of the industry. Our inks and our paper also comply with FDA and CFIA standards for food safety.

Lapaco's respect for the environment will stand the test of time for generations to come.

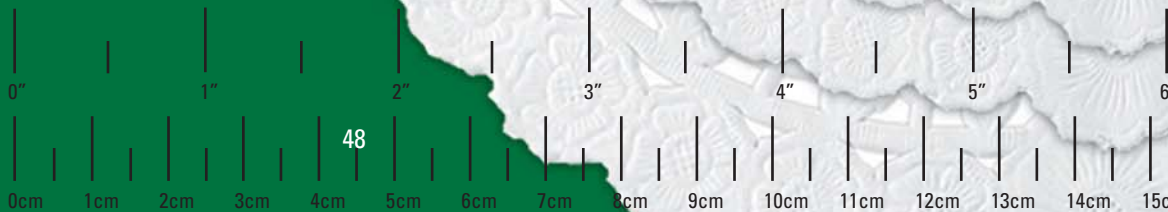

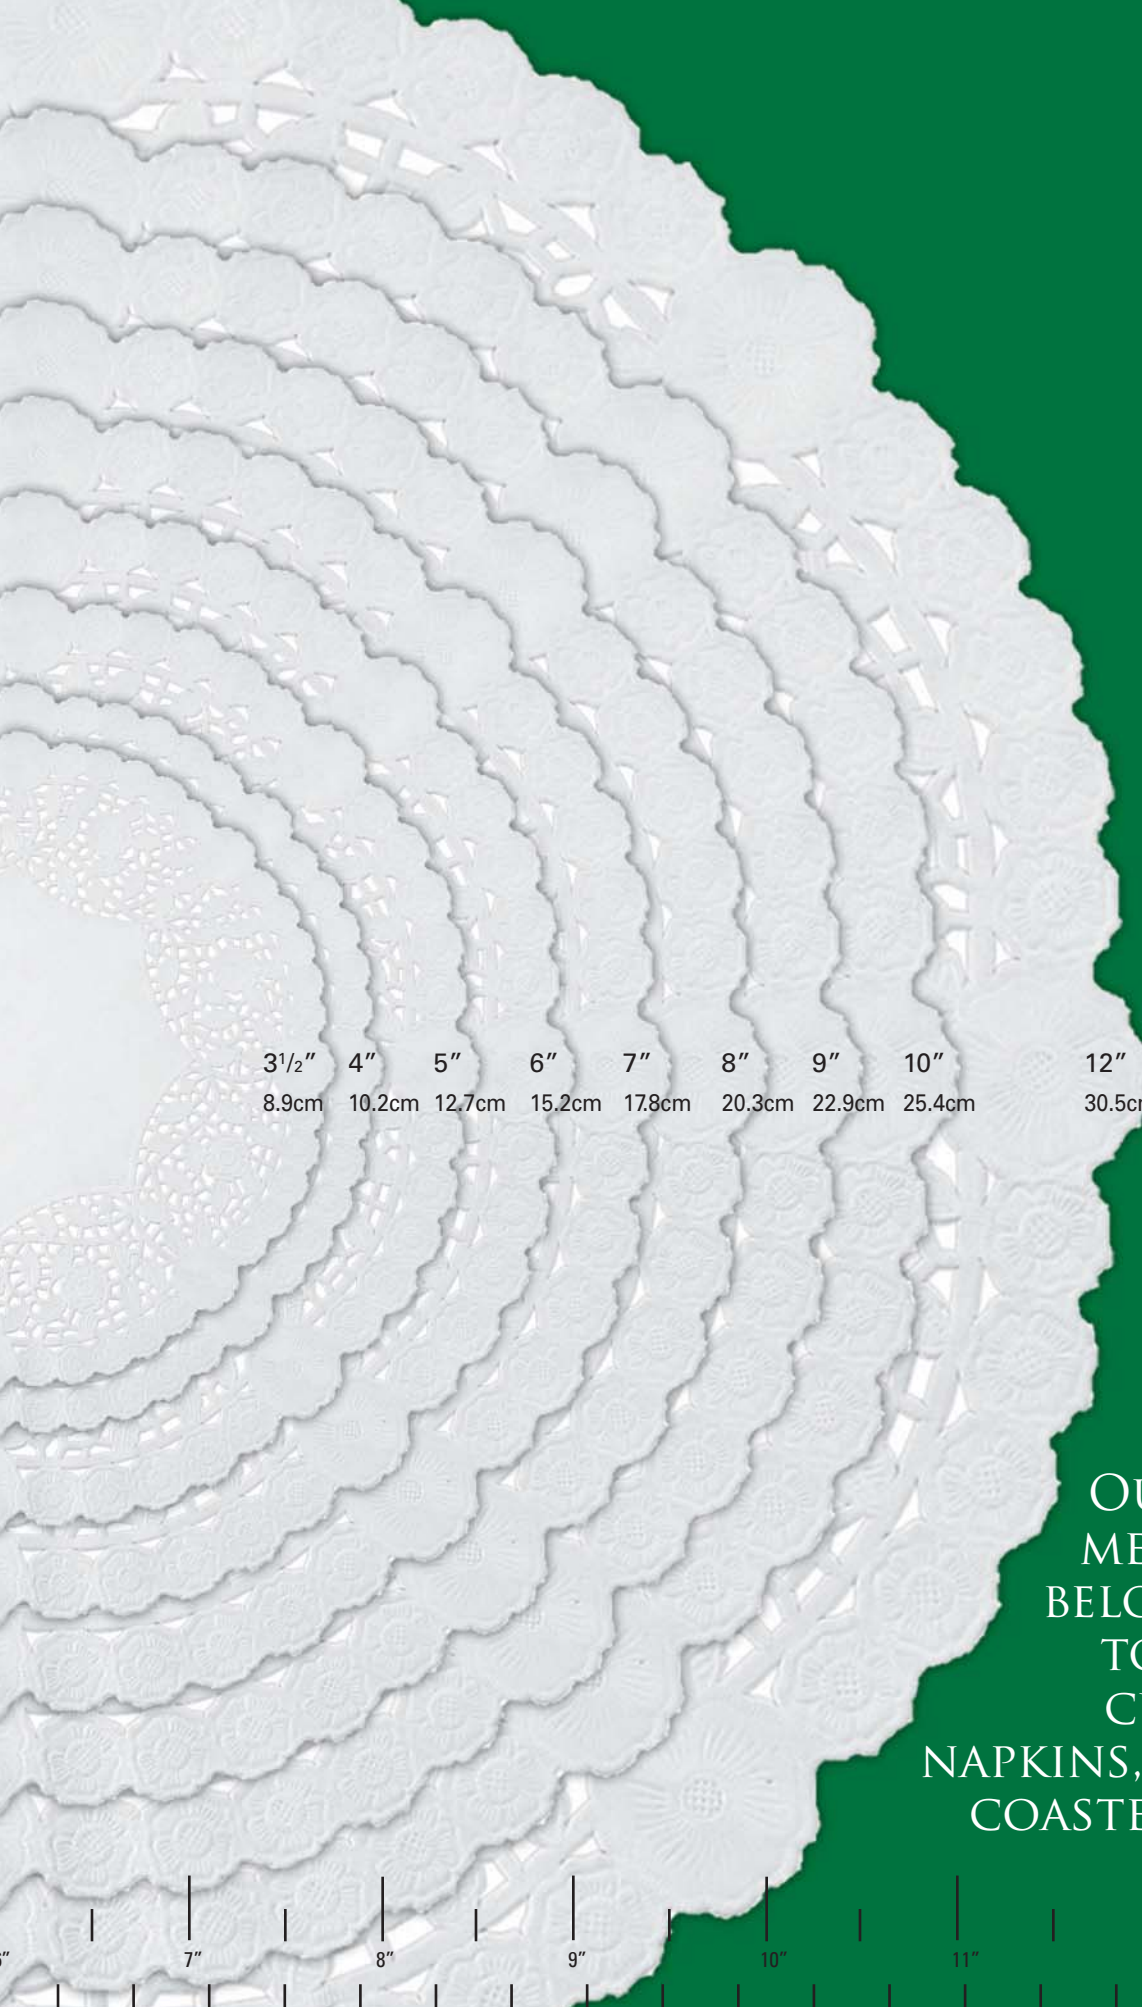

\*Paper used for baking cups has no recycled fiber content because of food standards inherent to this product.
