SOLUTIONS

Inspiration, Design & Eco-Friendly Solutions

PacknWood is the American and British brand of the family-owned French company, First Pack, which has been a leading designer and manufacturer of innovative food service products for over 35 years. Renowned for its strong commitment to the environment and broad range of fashionable, functional products, PacknWood has become an international tableware brand with a supply network that stretches from Asia, Africa, and Europe to North America, with distribution in 40 countries. With their new U.S. headquarters and showroom based in midtown Manhattan, PacknWood continues to operate and develop new products under the core philosophy of "ecolomique," a blend of French words for ecology and economy that the brand coined in 1990. PacknWood's goal is to create value by using natural, compostable and recyclable materials to design simple, high-quality products that are equally elegant and functional. The broad range of products extends from takeout packaging and lunch platters to tableware, utensils, and wares for catering, baking, cocktails and events.

PacknWood strives to find environmentally responsible solutions, to offer the very best high-quality products, and to providing outstanding customer response and service. Please visit our website Packnwood.com, where you can get more details and view our products in 360°, or call us at (201) 604-3840 to get started. We look forward to working with you.

New

PRODUCTS

Eco-Friendly Materials

Bamboo

Bamboo is the fastest growing plant on the planet, growing as large as 24 inches every night. Needing very little water to do so and absolutely zero chemicals. It is 100% biodegradable. One of our most popular materials, we turn it into sturdy and stylish serving dishes, cutlery, and skewers.**

Sugarcane

Sugarcane, also called Pulp or Bagasse, comes from the natural residue of the Sugarcane harvest. Previously this material was considered useless and destroyed, but our design team has been able to find several good uses for it. 100% biodegradable and compostable. **

Cornstarch

Once it is converted to a thermoplastic polyester known as PLA, cornstarch is strong just like regular plastic only it is completely compostable. Though, it can't withstand high temperatures, PLA is a versatile material that can be used in a variety of ways.**

Wood

PackWood cultivates the best wood from specially curated forests located all over the world. We systematically grow our trees to make our products and we replace every tree we use. Whether it is birch, poplar or pinewood, our extensive line of wood products will add a smooth and sophisticated touch to your tableware presentation. **

Recycled & Recyclable Plastic

Polyethylene terephthalate, or PET is a recycled plastic made from fossil fuels like natural gas that we use to make bottles and other transparent products. PET continues to be recyclable, ensuring that the material is sustainable and leaves the smallest possible footprint on the environment.

Palm

We can make elegant and eco-friendly bowls and plates just by collecting the sheaths of a palm tree, which naturally dry, fall, and regenerate all on their own. Our palm sheaths are always cleaned in fresh spring water, and the remains are totally renewable. The best part is we don't ever have to cut down a single tree! **

Cardboard & Paper

Our cardboard and paper products are natural and recyclable, and are an affordable green alternative to plastic.

Doublewall Glass

Made of borosilicate glass, our reusable doublewall glass products are very well designed and trendy. They are very resistant to thermal shock, doublewall glass helps maintain food temperature for longer.

** All of these materials are conform to norm EN13432 of the European Biodegradability Standard.
