Total Facility Solutions By Wausau Paper®

Wausau Paper offers a comprehensive line of premium and green products certified by Green Seal™ as well as complementary controlled-use dispensing systems for the away-from-home market. We offer unique brands of towel and tissue products: Artisan®, DublSoft®, DublNature® and EcoSoft®. Each brand, with its own unique attributes and benefits, offers customers high-quality products with exceptional performance.

The **Green Seal®** means that our products meet the most stringent and comprehensive environmental standard in our industry. In 2003, Wausau Paper became the first manufacturer to offer a complete line of towel and tissue products certified by Green Seal. Today, we have the most extensive line of Green Seal™-certified towel, tissue and soap products available in the away-from-home market.

Paper products with this logo meet Green Seal™ Standard GS-1 based on chlorine-free processing, energy and water efficiency, and content of 100% recovered material with a minimum of 50% post-consumer material for towels, 25% post-consumer material for bath tissue, and 15% post-consumer material for facial tissue. Hand care products with this logo meet Green Seal™ Standard GS-41A based on effective performance and protective limits on VOCs and human & environmental toxicity. GreenSeal.org.

Controlled Roll Towel Systems

Wausau Paper controlled roll towel systems with pre-measured dispensing control costs and waste by reducing towel consumption up to 20% over uncontrolled roll towels.

Controlled Bath Tissue Systems

OptiCore® technology, combined with our Revolution® and DublServ® dispensing systems, ensures maximum use of each roll in the dispenser before advancing to the next roll. This controlled use reduces product waste and cost.

Controlled Hand Care Systems

Wausau Paper provides hand care systems that dispense foam or lotion soaps. The OptiSource Convertible® system is available in both electronic and manual configurations, meeting any facility's budget and needs.

GREEN SEAL STANDARDS FOR TOWEL AND TISSUE (GS-1)

- 100% Recycled (recovered after papermaking process) – may also contain a mix of agricultural plant residue
- Minimum 50% post-consumer wastepaper content for paper towels (exceeds EPA minimum guidelines)
- Minimum 25% post-consumer wastepaper content in bath tissue and toilet seat covers; 15% facial tissue (exceeds EPA minimum guidelines)
- Product performance is consistently measured under controlled and reproducible laboratory conditions and products meet the requirements in the standard with respect to basis weight, tensile strength, stretch, and absorbency
- Hardwound 1-ply roll towel contains a minimum of 133 square feet of product per roll; 58 square feet per roll minimum for 2-ply kitchen roll towels
- Folded 1-ply paper towel contains a minimum of 84 square feet per package
- 2-ply bath tissue contains a minimum of 41 square feet of product per roll and facial tissue contains a minimum of 37 square feet per package
- The papermaking process, including deinking and/or bleaching, for producing paper towels and tissue is processed chlorine free (PCF) and does not contain any additives or contaminants that are carcinogens, mutagens or reproductive toxins
- The papermaking process meets the established limits for water disinfection and optical brighteners
- Papermaking additives are readily biodegradable, except for those noted in the standard
- Paper towels or bath tissue do not contain any added chlorophenolic biocides, fragrances, heavy metals, or ozone-depleting compounds
- Products are manufactured by companies that adhere to social responsibility guidelines and provide fair conditions of employment
- Products are manufactured within established annual water and energy use criteria
- The cores in the roll towels and bath tissue and the facial tissue boxes are made from 100% recycled materials
- Outer corrugated cardboard packaging is recyclable and made from at least 30% recovered material
- Packaging made from plastic is recyclable, or source-reduced by 20% or contains 25% recovered material content
- Packaging does not contain heavy metals, including lead, mercury, cadmium, and hexavalent chromium nor phthalates, bisphenol A, and chlorinated packaging material (for plastic packaging) that have intentionally been introduced
- Printing colorants on packaging do not contain lead, mercury, cadmium, and hexavalent chromium in excess of 100 parts per million (above trace levels)

Industry Innovation By Wausau Paper®

Wausau Paper leverages its expertise in green products with ATMOS papermaking technology to create unique product solutions for the away-from-home industry. This flexible papermaking process utilizes carefully chosen structured fabrics to produce premium Green Seal™-certified products designed for enhanced performance and appearance. This allows Wausau Paper to offer green towel and tissue products with exceptional plushness, brightness, strength and absorbency.

Structured for Sustainability and Quality

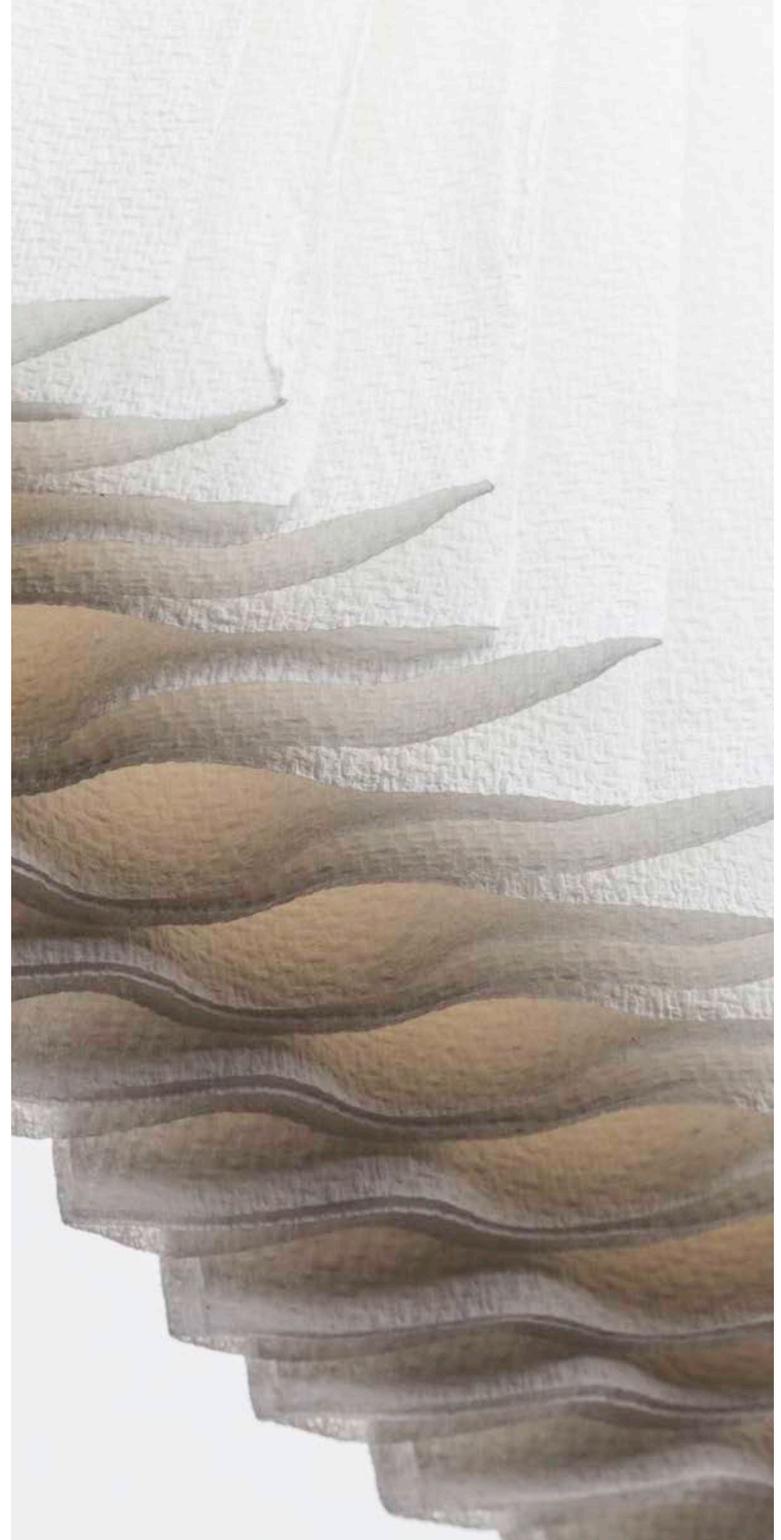

Wausau Paper chose to align with a technology that produces high-quality towel and tissue products while supporting sustainability. Allowing the use of 100% recycled fibers, ATMOS is environmentally superior to alternative papermaking technologies including Through-Air-Dried (TAD). With Wausau Paper's molding fabrics, paper products are also plush, soft, highly absorbent, and best of all, Green Seal™-certified.

Fashionably Formed

Wausau Paper offers DublNature® and Artisan® roll and folded towel products made with innovative ATMOS technology. This process provides premium toweling with exceptional plushness, softness and brightness. Featuring a unique weave pattern for a premium look and feel, DublNature® and Artisan® towels marry both feel and function to satisfy the most discerning customers.

Authentically Green®

All Wausau Paper products designed with ATMOS are certified as environmentally preferable by Green Seal, meeting comprehensive and strict guidelines for manufacture. Only Wausau Paper combines innovative papermaking and the finest quality fibers with the leading green certification to provide the most sustainable solution in premium paper products.

TOWEL

AND

TISSUE

Artisan®

Premium Towel Products Certified by Green Seal™

Artisan® Premium Towels

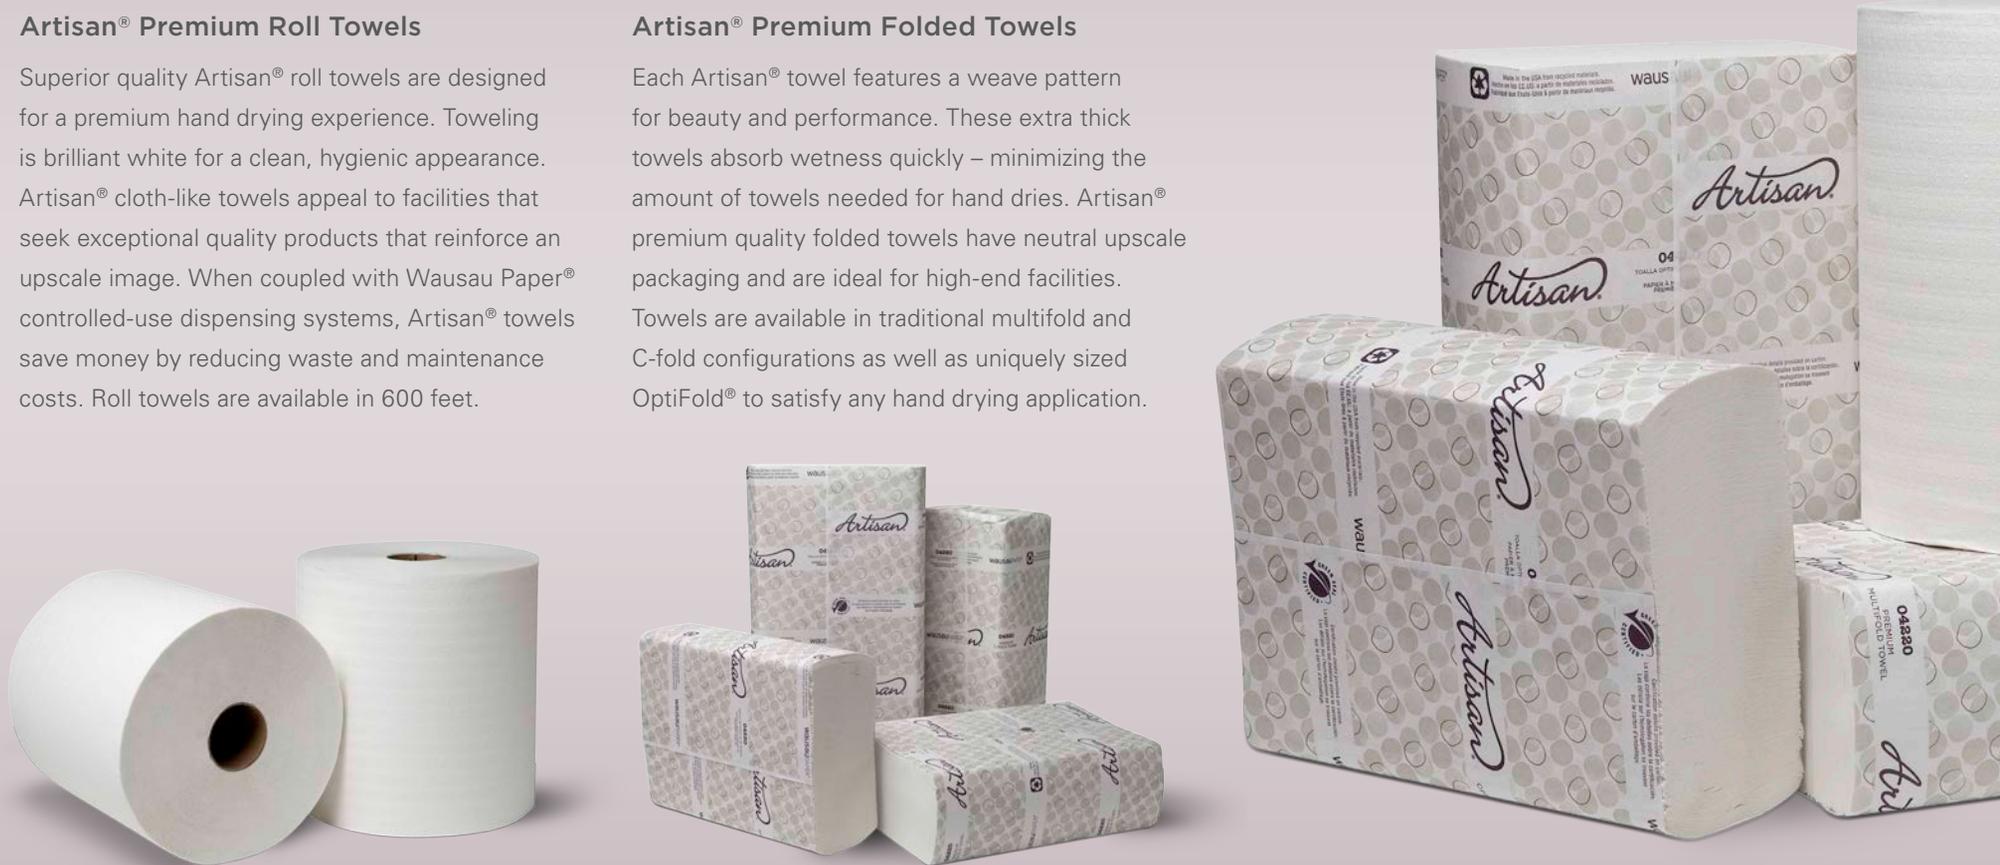

Artisan® offers superior sophistication for your hand drying experience. Carefully crafted from innovative ATMOS papermaking technology, toweling is brilliant white, remarkably strong, yet soft enough to provide a comforting hand drying experience. Artisan® caters to upscale properties such as Class A office buildings, high-end lodging establishments, and healthcare facilities. Artisan® possesses Green Seal™ certification along with luxury that is authentically designed for the refined.

Artisan® Premium Roll Towels

Superior quality Artisan® roll towels are designed for a premium hand drying experience. Toweling is brilliant white for a clean, hygienic appearance. Artisan® cloth-like towels appeal to facilities that seek exceptional quality products that reinforce an upscale image. When coupled with Wausau Paper® controlled-use dispensing systems, Artisan® towels save money by reducing waste and maintenance costs. Roll towels are available in 600 feet.

Artisan® Premium Folded Towels

Each Artisan® towel features a weave pattern for beauty and performance. These extra thick towels absorb wetness quickly – minimizing the amount of towels needed for hand dries. Artisan® premium quality folded towels have neutral upscale packaging and are ideal for high-end facilities. Towels are available in traditional multifold and C-fold configurations as well as uniquely sized OptiFold® to satisfy any hand drying application.

DublSoft®

Premium Tissue Products

DublSoft® Premium Bath Tissue

DublSoft® bath tissue features consumer-like floral embossing for exceptional softness. Universal tissue is available in 500 sheet count and a 400 sheet count to satisfy any facility's need. The OptiCore® tissue provides optimum savings in maintenance time and costs when combined with our OptiCore® dispensing systems.

DublSoft® Premium Facial Tissue

DublSoft® facial tissue offers superior softness for the most discriminating customers. Facial tissue features a blue food grade dye line to notify that product is low, thereby saving maintenance time. The stylish contemporary packaging makes the flat or cubed box facial an attractive addition to any décor.

DublNature®

High-Quality Paper Products Certified by Green Seal™

DublNature® Towels and Tissue

DublNature® products are manufactured with ATMOS technology and designed for comfort and functionality. DublNature® provides versatility and is ideal for office buildings, lodging establishments, healthcare facilities, restaurants, and colleges/universities. Offering the best in quality without sacrificing green sensibilities, DublNature® offers a premium Green Seal™ experience.

DublNature® Roll Towels

DublNature® roll towels offer the softness and strength needed to elevate your hand-drying experience. DublNature® features a unique weave pattern creating highly absorbent towels so fewer are needed per hand dry. And with such exceptional brightness, you'll hardly believe DublNature® roll towels are made from 100% recycled fibers and Green Seal™-certified. Towels are available in lengths of 450', 800' and 1,000' with controlled and universal options.

DublNature® Folded Towels

DublNature® folded towels are designed for performance and offer superior strength, absorbency and softness. Folded towels are made from high-class 100% recycled fibers and contain a minimum of 50% post-consumer waste. Available in multifold, C-fold and OptiFold® configurations, there is a DublNature® folded towel that meets any facility's need.

DublNature® Bath and Facial Tissue

DublNature® tissue is Green Seal™-certified with upscale packaging to promote a premium green image. Offering the beauty of consumer bath tissue, DublNature® features attractive floral embossing. Controlled-use and universal bath tissue is designed to provide exceptional plushness and softness. Cube or flat box facial tissue has an aesthetically pleasing design that complements any décor. DublNature® bath and facial tissue are ideal for establishments seeking a premium green image.

EcoSoft®

100% Recycled and Green Seal™-certified Paper Products

EcoSoft® Roll Towels

EcoSoft® roll towels satisfy those who prefer to purchase quality towels produced with methods less harmful to the environment. These roll towels are 100% recycled, meet or exceed EPA guidelines for post-consumer wastepaper content, and many are Green Seal™-certified. Available in white, natural white and natural, EcoSoft® roll towels provide waste reduction and cost savings benefits.

EcoSoft® Folded Towels

EcoSoft® folded towels are 100% recycled and available in singlefold, multifold and C-fold configurations. Most folded towels are certified as environmentally preferable by Green Seal, Inc. of Washington, DC.

EcoSoft® Bath Tissue

Embossed for softness, EcoSoft® tissue provides the quality users expect. EcoSoft® tissue is offered in single and double ply and designed for use with our controlled-use, universal, and jumbo dispensing systems. Available in 100% recycled and Green Seal™-certified options.

EcoSoft® Facial Tissue

EcoSoft® facial tissue is soft, made of 100% recycled fiber and meets or exceeds EPA guidelines for post-consumer wastepaper content. Facial tissue offers the feel of household tissue with attractive, environmentally preferable packaging.

EcoSoft® Household Roll Towels

EcoSoft® household roll towels feature a quilted diamond emboss for superior absorbency and performance with the wet strength needed for use in business and industry. Green Seal™-certified and available in a variety of sheet counts.

EcoSoft® Toilet Seat Covers

EcoSoft® toilet seat covers provide maximum sanitary protection and are Green Seal™-certified.

Dubl-Tough®

Industrial Wipers

Dubl-Tough® industrial wipers provide versatility ranging from light to heavy-duty applications. Dubl-Tough® wipers are strong, soft and absorbent and are offered in two substrates and packaging configurations.

Heavy Duty: Ultra Dubl-Tough®

- Double recycle (DRC) substrate
- Perfect for absorbing liquids and leaves surfaces streak-free
- Ideal for use with chemical solvents

Single Duty: Mighty Dry Dubl-Tough®

- Maximum strength, absorbency and softness
- Ideal for light oil, dirt and water
- Virtually lint free

Sirrus®

Household Roll Towel

Sirrus® Household Roll Towels

Sirrus® household roll towels feature packaging compliant for retail sale. Sirrus® has an attractive quilted diamond emboss creating soft and absorbent household towels.

Dari-Towels®

Single-use Wausau Paper® Dari-Towels® protect profits by helping control the spread of infectious mastitis. More sanitary than rags or sponges, Dari-Towels® provide a set of clean, absorbent prep towels for each cow, minimizing the chance of cross-contamination in the herd.

Advanced Scrubbing Dari-Towels®

Thick and absorbent 39020 Dari-Towels® are made with ATMOS technology for fast, thorough wiping and drying resulting in exceptional sanitary protection.

General Purpose Dari-Towels®

The 47010 and 25000 Dari-Towels® offer versatility for wiping and drying. Made entirely from 100% recovered fibers, 47010 and 25000 Dari-Towels® offer an alternative for environmentally-conscious dairy farms.

Pre-Dip Dari-Towels®

Used regularly, pre-dip towels safeguard the herd and reduce the spread of infectious mastitis. This helps to minimize veterinary expenses and lower overall operating costs.

High-Capacity Electronic Dispensing

With twice the capacity of typical electronic towel dispensers, the Alliance® offers the highest capacity in the industry. Unlike traditional roll towel dispensers, the Alliance® dispenser's revolutionary design accommodates two full rolls of towels – up to 2,000' – keeping high-traffic areas up and running while reducing maintenance.

Simply Intelligent

Alliance® seamlessly transfers between rolls without the need to move stub rolls. This smart dispenser prepares newly loaded rolls, while continuing to utilize the smaller roll for optimum efficiency. Battery and product status indicator lights provide visual alerts to streamline service visits.

Customize for Your Environment

Tailor the Alliance® to any heavy traffic area. Offering selectable dispense modes, the Alliance® has settings to receive a towel upon the wave of a hand or arm (valet) or to automatically dispense a towel when one is taken (on demand). Towel length can be adjusted based on facility or user preference to 11" or 18" per hand dry. Alliance® is configured to be serviced from either the right or left increasing the options for placement.

Cases/Unit 48
Average Case Cube 1.48

Electronic Convenience for Automated Washrooms

The Wave'n Dry® dispenser is a pioneer in the touch-free towel dispensing market. With no levers, buttons or cranks, the Wave'n Dry® dispenses a single towel at the wave of a hand, ensuring that the only thing you touch is your personal towel. Towels are stored fully protected inside the dispenser until you request service, which is particularly important in public washrooms, food preparation areas and healthcare environments where prevention of cross-contamination is critical.

Controlled-Use Dispensing

Tailor dispensing to your facility's needs by choosing a pre-set towel length of 8", 11", 16 $\frac{1}{2}$ ", or 22" and choose the optimal settings for delay between cycles and sensor sensitivity to prevent waste while meeting user needs.

optiSERV^{hybrid}®

Flexibility Built Into a Functional and Attractive Design

Unique and elegant, the OptiServ Hybrid® offers the benefits of electronic touch-free dispensing as well as the convenience of mechanical dispensing when desired. In either mode the OptiServ Hybrid® delivers a single pre-measured towel that encourages users to take only what is needed to reduce waste making it ideal for office buildings, colleges and universities and high-traffic washrooms.

Controlled-Use Dispensing

Metered dispensing discourages waste and controls cost. A locking cover prevents pilferage.

optiSERV^{accent}®

The Perfect Solution for Small Spaces

The OptiServ Accent® is ideal for environments where space is limited. Designed to fit tight spaces previously reserved for folded towels, the OptiServ Accent® provides the operational benefits of a larger roll towel dispenser in a compact and attractive design.

Controlled-Use Dispensing

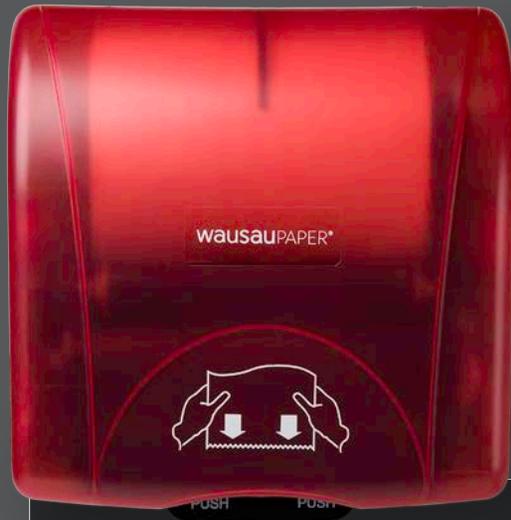

Each pull of the exposed towel dispenses a single 11-inch towel to discourage waste and control cost. A locking cover prevents pilferage.

Dispenser colors noted as special order require a minimum pallet quantity and lead time applies.

HAND HYGIENE: **PAPER TOWELS** VS. AIR DRYERS

The World Health Organization (WHO) and Centers for Disease Control and Prevention (CDC) recommend hands be washed 40-60 seconds and thoroughly dried using a paper towel. To prevent potential cross-contamination, use the paper towel to turn off the water faucet.²

Myth:

Warm air and jet air dryers are **more hygienic** than paper towels.

Did you know?

Warm air dryers **increase** the number of bacteria on fingertips and palms by up to 254%.¹

Jet air dryers **increase** the number of bacteria on both the palms and fingertips by up to 42%.¹

Fact:

Using paper towels after washing hands **reduces the number of bacteria** both on the palms and fingertips by up to 77%.¹

Myth:

Warm air and jet air dryers are **less likely to contaminate** the washroom environment.

Did you know?

Warm air dryers are capable of blowing bacteria and potentially contaminating the washroom up to **nine inches away**.¹

Jet air dryers that claim to blow air out of the unit at speeds of 400 mph are capable of blowing bacteria up to **six feet away**, potentially contaminating the washroom and other occupants.¹

Fact:

Using paper towels after washing hands showed **no significant potential of cross-contamination**.¹

¹Comparison of the Drying Efficiency and Hygiene of Paper Towels with Electric Hand Dryers, prepared by Keith Redway and Shameem Fawdar, School of Biosciences, University of Westminster, London, 2008.

dublSERV[®] HC

Highest Capacity OptiCore[®] System

The DublServ[®] HC provides an attractive alternative to coreless and mini jumbo tissue dispensers. Designed to lower maintenance costs in the busiest washrooms, the DublServ[®] HC accommodates two 2,000-sheet rolls of high-quality perforated tissue. Patented OptiCore[®] technology prevents stub roll waste associated with coreless designs and ensures complete utilization since each roll is completely depleted before the next roll is accessible. The DublServ[®] HC features a locking cover to prevent product pilferage.

REVOLUTION®

High-Traffic OptiCore® Dispensing

The Revolution® dispensing system is designed to minimize maintenance and maximize cost savings for high-traffic areas. With its revolving design and our patented OptiCore® tissue, the Revolution® ensures that a roll is completely depleted before the dispenser will advance to the next roll, eliminating waste. Capacity for three OptiCore® tissue rolls allows for longer periods between maintenance. The Revolution® features a locking cover to prevent product pilferage and is available in five color choices.

optiCORE[®] recessed adapter

Adapts Existing Dispensers to Reduce Cost

The OptiCore[®] Recessed Adapter quickly and easily converts many existing 2-roll vertical recessed dispensers to the capacity of three rolls without removing dispensers. Using patented OptiCore[®] RC tissue, dispenser sheet capacity is increased by 50% versus typical universal tissue. OptiCore[®] technology lowers maintenance time and reduces waste by ensuring each roll is fully utilized before the next is accessible.

DublSoft

DublSoft® premium OptiCore® 2-ply bath tissue is for those customers who demand the maximum in strength, brightness and softness. DublSoft® products will meet that demand. This tissue also offers an attractive premium embossing pattern that any customer can appreciate. DublSoft® packaging is designed for the most upscale applications and is an attractive addition to any décor.

DublNature®

DublNature® OptiCore® tissue offers superior quality with a stylish and sophisticated appearance. DublNature® products are made from a superior grade of 100% recycled wastepaper for exceptional brightness and overall quality. Featuring consumer-like embossing and environmentally preferable packaging, Green Seal™-certified DublNature® tissue is ideal for a wide range of applications.

EcoSoft®

EcoSoft® OptiCore® bath tissue is certified as environmentally preferable by Green Seal, Inc., in Washington, DC. Made from 100% recycled fiber with a minimum of 25% post-consumer waste content, EcoSoft® far exceeds the EPA guidelines. The tissue products also feature environmentally preferable packaging. Available in high-capacity, standard, or recessed capacity OptiCore® rolls.

ELECTRONIC

OptiSource Convertible® Electronic

For the ultimate in cleanliness, the electronic OptiSource Convertible® eliminates the need to touch dispensers so hands are not cross-contaminated. When installed according to ADA guidelines, this dispenser is ADA Title III compliant.

- Pre-measured dose: 1.0mL lotion, 0.75mL foam
- Adjustable setting for sensor, dose and speed
- Locking cover prevents product pilferage
- Estimated battery life expectancy 9-12 months dependent upon usage

optiSOURCE convertible®

MANUAL

OptiSource Convertible® Manual

The manual OptiSource Convertible® has a durable design and can be used with foam or liquid soap cartridges. It is ADA Title III compliant when installed according to ADA guidelines.

- Pre-measured dose: 1.0mL lotion, 0.75mL foam
- Large push bar for easy activation
- Locking cover to prevent product pilferage
- Can convert to electronic touch-free

Most Wausau Paper dispensers are ADA Title III compliant when installed according to ADA guidelines. Product is easily dispensed with one hand, with less than 5 lbs. of force, and without tight grasping, pinching or twisting of the wrist.

Forward Reach for Wall Mounted Dispensers

308.2.1 Where a forward reach is unobstructed, the high forward reach shall be 48 inches (1220mm) maximum and the low forward reach shall be 15 inches (3810mm) minimum above the finish floor or ground. [Section 308.2.1, ADA Accessibility Guidelines]

308.2.2 Where a high forward reach is over an obstruction, the clear floor space shall extend beneath the element for a distance not less than the required reach depth over the obstruction.

The high forward reach shall be 48 inches (1220mm) maximum where the reach depth is 20 inches (510mm) maximum. Where the reach depth exceeds 20 inches (510mm), the high forward reach shall be 44 inches (1120mm) maximum and the reach depth shall be 25 inches (635mm) maximum. [Section 308.2.2, ADA Accessibility Guidelines]

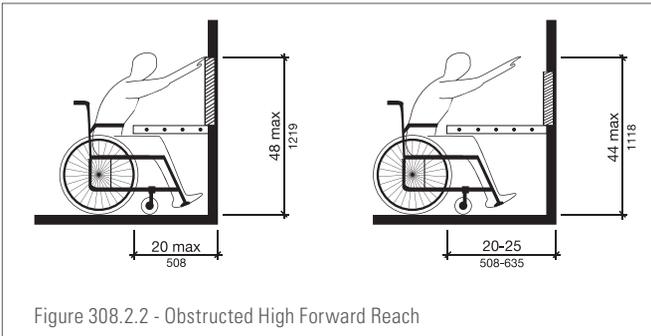

Figure 308.2.2 - Obstructed High Forward Reach

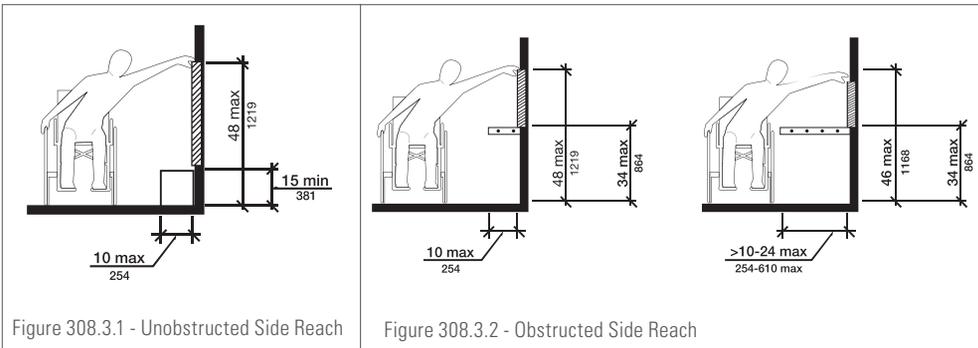

Figure 308.3.1 - Unobstructed Side Reach

Figure 308.3.2 - Obstructed Side Reach

Dispenser Installation in Water Closets and Toilet Compartments

604.7 Toilet paper dispensers shall comply with section 309.4 and shall be 7 inches (180mm) minimum and 9 inches (230mm) maximum in front of the water closet measured to the centerline of the dispenser. The outlet of the dispenser shall be 15 inches (380mm) minimum and 48 inches (1220mm) maximum above the finish floor and shall not be located behind grab bars. Dispensers shall not be of a type that controls delivery or that does not allow continuous paper flow. [Section 604.7, ADA Accessibility Guidelines]

ADVISORY 604.7 If toilet paper dispensers are installed above the side wall grab bar, the outlet of the toilet paper dispenser must be 48 inches (1220mm) maximum above the finish floor and the top of the gripping surface of the grab bar must be 33 inches (840mm) minimum and 36 inches (915mm) maximum above the finish floor.

Dispenser Installation and Side Reach Obstructions

308.3.1 Where a clear floor or ground space allows a parallel approach to an element and the side reach is unobstructed, the high side reach shall be 48 inches (1220mm) maximum and the low side reach shall be 15 inches (380mm) minimum above the finish floor or ground.

EXCEPTION

An obstruction shall be permitted between the clear floor or ground space and the element where the depth of the obstruction is 10 inches (255mm) maximum.

308.3.2 Where a clear floor or ground space allows a parallel approach to an element and the high side reach is over an obstruction, the height of the obstruction shall be 34 inches (865mm) maximum and the depth of the obstruction shall be 24 inches (610mm) maximum.

The high side reach shall be 48 inches (1220mm) maximum for a reach depth of 10 inches (255mm) maximum.

Where the reach depth exceeds 10 inches (255mm), the high side reach shall be 46 inches (1170mm) maximum for a reach depth of 24 inches (610mm) maximum. [Section 308.3, ADA Accessibility Guidelines]
