 Frequent cleaning with Mr. Muscle® Fryer Boil-Out enhances the characteristics of equipment and improves the quality of fried food. A clean fryer operates more efficiently and lasts longer. Carbonized grease that has accumulated on the interior surface of the fryer imparts a rancid flavor to deep-fried foods. This problem is eliminated with routine use of Mr. Muscle®, as shortening stays fresher and works longer in equipment that is cleaned on a regular basis. Portion control pouch helps simplify product handling, eliminates waste and control cost. Low-foaming formula degreases and cleans foodservice fryers, while preventing boil over. Heat and chemical action combine to penetrate, emulsify and clean away built-up grease. Eliminate the need for neutralizing. Non-corrosive. Contains no phosphates. NSF A8 Registered.

Social responsibility, respect and care for the environment require action today while keeping an eye on the future. Pactiv has developed a new line of "to-go" hinged lid containers that captures the latest innovations in hybrid materials. EarthChoice™ SmartLock® hinged lid containers are made from talc-filled polypropylene which contains on average 40% less plastic polymers than standard polypropylene containers. This hybrid material is microwaveable up to 250°F and is ideal for your hot food takeout menu items. SmartLock® Closure System provides an audible "click" indicating a secure closure. Textured sidewalls provide more secure handling. Stackable.

Meat Tray Pads/Pallet Wrap/Twine

FOODSERVICE PROCESSING, WRAPS & APPAREL

A. DRI-LOC® ABSORBENT PADS SEALED AIR

One-way valves and sealed edges keep product fresher, longer. Reduces costly rewraps and product downgrades. Keeps display cases cleaner. Greater customer satisfaction; packages stay drier and more attractive. Pads absorb juices only from the bottom of the pad and do not dry out the meat. Meat retains fresh, juicy appearance longer.
